Thermal Systems / E-Cooling Expansion Tank

Technical Data

order number	description	Fluid Gauge	Weight
		min / max.	[kg]
HT0006G25SW	Expansion tank 5,5 Liter	1,9 / 4,2 l	2,9

Tank				
	tank material	aluminium		
Fluid Level Monitoring				
	with oil level gauge HTFLP05M10K			
Temperature				
	working temperature (NBR)	-20°C to +80°C		
Options				
	oil level gauge with temperature scale	HTFLP05M10TK		
	electrical level switch	on request (HTZLSG2065)		
Compatibility				
	water/glycol			

This data sheet and the corresponding scale drawings are to be used as a general guideline and technical overview of our products. Please contact us if more exact information is needed. As we are constantly improving our products, their characteristics, dimensions and weights may also change, although we do our best to incorporate these changes continually, as a assumes no liability for any information therein, any errors, omissions, misprints, nor any direct or indirect damages, losses or costs resulting therefrom. Any cooling performances and general technical values indicated in this catalogue are measured at a test bench according to as a testing procedures or calculated, based on such tests. They represent a basis for your product selection. Due to different conditions in testing and application environments the performance may also vary by +/- 15%. All sound values are determined in accordance with 1SO 9614-2, DINE NISO 11203 accuracy class 3 of Machinery Directive 2006/42/EG and are A-rated. At some of the performance data, possible differences to competition data are possible. The reason to that are no existing standardized testing procedures on individual subjects, e.g. for cooling performance measurements. Therefore, we recommend all products to be checked under the system operating conditions. This is also true of vibrations and mechanical stress as well as for pressure peaks and thermal stress and any other relevant factors. General tolerances according to 1SO 3302-1 (class M4-F4C). The tolerances of welding seams are defined by quality group 1 according to EN ISO 1004. If it is not specified on the actual scale drawing or data sheet. Any form of liability is excluded for the information included in this datasheet. All details and calculation values are checked to the best of our ability, but these do not ensure any intrinsic product properties: due to the wide-ranging possible applications, it is advised that all technical data herewith included be confirmed through testing carried out by the choic
